### **My Style**

I use a photo journalistic style, with a small mix of traditional formals. I want to capture your intimate expressions, as they are true in life. Shooting candid photos, allows me to document your wedding day one laugh and one tear at a time. One moment captured, creates a lifetime of your memories.

### **My Approach**

I offer Flush Mount Albums with all my Forever packages. This book is one of the most precious documents of your wedding day. Memories can fade, but a photograph can spark a lifetime of emotion. I layout your photographs in your album and delivery the final layout to you within three weeks from your wedding date. From the makeup, to the kiss, to the tossing of your bouquet, let me tell your unique story from the beginning. You can make changes, but I find that for brides it is difficult to process all the photographs to layout. I want to take that step out of your hands, so you can enjoy your photographs today, tomorrow, and forever.

### **About Thallo**

Thallo Design is a floral and event design company. Thallo was the goddess of flowers... with Thallo as our muse, we strive to produce fresh floral creations that push the boundaries of one's imagination. Fine workmanship and individualized service is our cornerstone and we constantly seek out the freshest, most exceptional blooms. We personally deliver and set up all our work. Thallo representatives will be on site to execute your ceremony décor.

At the 3 week mark, we are happy to make additions, but we cannot subtract from the order since at that point our preliminary flower order will have been submitted. Should the table count fall below your projections, we will utilize those flowers elsewhere in the plan.

*Thallo expects that all flowers suggested in our proposals will be available and in good condition the week of your event. In dealing with Mother Nature however, there is always a calculated amount of uncertainty and the possibility of change. In the event of shortages or unavailability, Thallo will use its discretion in choosing an appropriate substitute.*
